Labour Force Survey Report, 2011

FOREWORD

The Labour Market Information Division of the Department of Employment, Ministry of Labour and Human Resources (MoLHR) is pleased to publish the 9th National Labour Force Survey Report, 2011 conducted during April, 2011.

The stability and growth of the country's economy depend on the proper execution of planning and decision making. For this purpose, it is necessary to have a clear knowledge and understanding of the size, composition and economic characteristics of the population. Therefore, it is imperative to know and monitor the growth of human resources categorized by its respective demographic features and educational level on a timely basis.

The Ministry of Labour and Human Resources has been conducting the Labour Force Survey (LFS) since 1998. Since then, it has become a regular activity of MoLHR. The Department of Employment will conduct the Labour Force Survey annually to enable the Ministry to assess the current and emerging labour situation in the country.

We would like to express our deep appreciation and acknowledge for the cooperation received from the National Statistics Bureau (NSB). I would also like to extend special thanks to the Dzongkhag Administrations, the Thuemis, Gups, Geog Administrative Officers, Chupons, Mangmis and our esteemed respondents for their generous cooperation and support rendered to our survey teams without which the survey would not have been possible.

I am hopeful that this survey report will be informative and a useful document to people working at all levels of administration, decision making, planning, research and other group of beneficiaries. Suggestions and comments are welcomed for its further improvement.

MINISTER, MOLHR

Labour Force Survey Report, 2011

NOTES FOR USERS

1. In the present survey, some revisions were made in the questionnaire used, so the contents of some tables might be different from the previous reports.
2. The present issue contains statistics which became available by June 30, 2010.
3. At the beginning of each chapter, general description is presented on contents of the chapter, objects and methods of surveys, definition of terms and source of data.
4. General remarks on each table and graph are stated in the head note, and specific notes on selected items or cells are shown in footnotes.
5. Unless otherwise indicated, “Year” refers to the calendar year, and “Fiscal Year” refers to the 12 months beginning from July to June.

n.a	not available
‘0’	rounded to zero
CY	calendar year
FY	fiscal year
*	sampling error too high for accurate estimation or estimates less than one percent
()	negative numbers

6. Detail figures in the tables may not add up to the totals because of rounding.
7. The statistical figures under educational attainment and employment by economic activity or sector may differ from figures in other publications due to difference in sources. No adjustment is made between them.
8. When any contents of this report are to be quoted or copied in other publication, it is requested to refer to the title of this report as follows.

	Female	3.2	2.0	3.3	3.8	5.4	4.0	4.5

Labour Force Survey Report, 2011

SECTION 1 - INTRODUCTION

Labour Force Survey is a regular activity of the Labour Market Information Division under the Department of Employment. It is conducted with a fixed reference period owing to which it is expected that there will be a slight variation in the activity. This is the 9th nationwide Labour Force Survey, which has covered a national representative sample of 12,000 households (urban=9000 & rural=3000). The survey covered more sample households in the urban areas because the urban population is more heterogeneous. The data includes demographic characteristics, economic characteristics and child statistics.

1. METHODOLOGY

The statistics contained in this publication are based upon information obtained from 12,000 sampled households (Urban and Rural). Personal interviews were carried out in each representative household. Out of 12,000 sampled households only 11,870 households (questionnaires) were fully completed, accounting for 98.9% completion rate. Of 12,000 households, 130 households did not respond, which comprises 1.1% non response rate. The sampling frame had been developed from the Population Housing and Census of Bhutan 2005.

2. OBJECTIVES & COVERAGE

Labour Force Survey aims to provide a quantitative framework for the preparation of plans and formulation of policies affecting the labour market.

Specifically, the survey is designed to provide statistics on levels and trends of employment, unemployment, labour force participation, child statistics and various other socio-economic characteristics. Broadly the objective of the survey is to generate the following:

- Percentage of economically active population
- Labour force participation rate
- Status of active population in number (employed + unemployed)
- The labour force available in the country by age group, sex, level of education, nationality, marital status, area of residence, by industrial and occupational classification, hours of work.
- The survey also provides information on main and subsidiary economic activities and women's participation in the total labour force. It also reveals the labour situation especially the young generation entering labour market and unemployment problem.

The survey covered all the 20 Dzongkhags and 196 sampled chiwogs in the rural areas and 255 sampled blocks in the urban area. The foreign nationals and those members who were temporarily absent from the households but living in the institutions like school; hostels, army barracks, hospital and prisons were included. Concurrently, the survey excluded those members who were absent from the household for more than six months.

3. QUESTIONNAIRE

The questionnaire used for 9th Labour Force Survey is the revised form of 2009 and 2010 Labour Force Survey questionnaires. This had been done by the teams from the National Statistics Bureau and Labour Market Information Division of the Ministry of Labour and Human Resources.

The questionnaire has been pre-tested and reviewed number of times to ensure its precision. The questionnaire comprises three parts, namely, the socio-demographic characteristics, economic characteristics and child labour. The economic characteristics is collected only from those persons aged 15 years and above as per the International Labour Organization (ILO) definition of economically active cohort of population. Child labour statistics is collected from those persons aged (10-17) years. (A copy of the questionnaire is attached in the annexure for reference)

Labour Force Survey Report, 2011

4. SAMPLE DESIGN

Universe: The universe for Labour Force Survey 2011 consists of all the urban and rural areas of Bhutan i.e all the 20 Dzongkhags

i. Sampling Frame: The sampling frame has been developed by the National Statistics Bureau. Each town in a Dzongkhag has been divided into numerous enumeration blocks. The block for the urban has been demarcated by the Department of Urban and Housing Development, Ministry of Works and Human Settlement. Enumeration blocks for urban and chiwogs for rural have been considered as Primary Sampling Unit (PSUs). The households in both urban and rural were considered as Secondary Sampling Unit (SSUs).

ii. Stratification Plan: Each Dzongkhag is considered as primary stratum and the stratifying factors used were the geographical demarcation of the administrative boundaries developed by the Department of Survey & Land Records, Ministry of Agriculture and Forestry. There were two sub-strata namely urban and rural.

iii. Sample Design: A stratified two-stage sample design has been adopted for the survey.

- a. **Selection of primary sampling units (PSUs):** The blocks and the chiwogs have been taken as the PSUs in urban and rural respectively. In both the urban and rural areas the blocks and chiwogs were selected with the assignment of Probability Proportional to Size (PPS)
- b. **Selection of secondary sampling units (SSUs):** The households in the sampled blocks and chiwogs were considered as SSUs. A fixed number of sample households have been selected from the selected PSU's by Circular Systematic Sampling (CSS) method after listing the households present in blocks and Chiwogs exhaustively.

iv. Sample size and its allocation: With the resources at our disposal, the nature of population distribution and the variability of characteristics for which the estimates are to be made, a sample of 12000 households have been found appropriate to provide reliable estimate of key labour force characteristics. It is also based on the past experience.

Area	Bhutan	Sample for LFS 2011			Sampling Fraction
	Total no. of blocks/chiwogs	Blocks/chiwogs	Households	Total households	
Urban	280	255	9,000	37,857	1/4
Rural	1,908	196	3,000	87,804	1/33
Total	2,188	451	12,000	125,661	1/10

Labour Force Survey Report, 2011

5. Distribution of sampled blocks/chiwogs and households under each Dzongkhag, 2011

Sl. No	Name of Dzongkhag	Urban		Rural		Total
		Number of sample blocks	Number of sample households	Number of sample chiwogs	Number of sample households	Number of households
1	Bumthang	4	90	3	45	135
2	Chukha	56	1,845	13	195	2,040
3	Dagana	7	150	7	105	255
4	Gasa	1	75	3	45	120
5	Haa	4	150	4	60	210
6	Lhuntse	3	135	10	150	285
7	Mongar	12	300	15	225	525
8	Paro	5	195	10	150	345
9	Pemagatshel	10	195	10	150	345
10	Punakha	1	120	9	135	255
11	Samdrup Jongkhar	18	465	12	180	645
12	Samtse	14	510	22	330	840
13	Sarpang	18	510	8	135	645
14	Thimphu	66	3,045	5	105	3,150
15	Trashigang	13	270	26	405	675
16	Trashie Yangtse	5	195	8	120	315
17	Trongsa	3	150	5	75	225
18	Tsirang	2	120	7	105	225
19	Wangdue	6	345	12	180	525
20	Zhemgang	7	135	7	105	240
	Total	255	9,000	196	3,000	12,000

Note: Some blocks/chiwogs are selected twice and thrice etc. and will have to be adjusted in selection of households within the selected blocks/chiwogs.

8. Field Operation: Ministry of Labour and Human Resources is the organization responsible for collection, processing, compilation and dissemination of labour statistics.

For maintaining the conformity of survey concepts, definitions and procedure to be used during enumeration, training for duration of 1 week was imparted to the concerned supervisors and enumerators on interviewing techniques and survey procedures. For quality control, supervisors made frequent visits to the field for spot-checking during the data collection. A field coordinator travelled all 20 Dzongkhags to monitor the supervisors.

Labour Force Survey Report, 2011

9. Method of data collection: Data have been collected by direct interview method. There were 150 enumerators in the field led by 10 supervisors. The information collected pertains to the reference period (one week before the actual date of the interview).

10. Non-response rate: Out of 12000 households, 130 were found as non-response accounting for 1.1%. One major source of non-sampling error is non-response. Non-response is caused due to absence of occupants in the sample house, may be due to total refusal to answer any of the questions and sometimes when the interviewee is incapable to answer etc.

11. Data Processing: Soon after data collection, the supervisors were held responsible to edit and check the filled in questionnaires for consistency and completeness and sent for revisits wherever necessary. Further coding, manual checking and editing were done at the headquarter. Also during data entry in Census and Survey Processing System (CSPRO), further identified errors were edited by applying computer edit checks, data ranges in numerical values in order to eliminate erroneous data resulted while coding. The survey records were edited and corrected through a series of computer processing stages.

Labour Force Survey Report, 2011

SECTION 2 - CONCEPTS & DEFINITIONS

In order to enable users to interpret the results from Labour Force Survey, it is essential to be familiar with the concepts used. The definitions and explanations for each of the key concepts are given below:

1. Reference period

Last one week prior to the date of enumeration has been used as the reference period.

2. Work

According to International Labour Organization (ILO) standards and United Nations 1993 System of National Accounts, work includes any kind of works or businesses including collecting water or firewood, cow herding, tailoring or making mates, etc. even for the households' own consumption.

Examples of activities which are counted as a work

Activities counted as work

- Growing or gathering crops from the field, producing eggs, milk, food, cow herding, etc.
- Milling and other food processing activities, milling grains, making butter and cheese, brewing local wine, etc.
- Yarning and weaving clothes, making baskets and mats, peat making, tailoring, and making furniture, etc
- Construction of own house/buildings, major renovation of private roads and other private facilities.
- Fetching water, cutting or collecting firewood.
- Activities of a religious order such as a Rimdro, rituals etc.

Activities not counted as work

- Preparing and serving meals
- Unpaid family member (baby-sitting, training & instructing children, transporting household members/goods, repairing household durables, vehicles or other goods, etc.)

3. Study

Includes, those who are presently school going children, monks residing in the Dratshangs and Shedras and also those undergoing higher studies (Post Graduation, Ph.D, etc.)

4. Occupation

Occupation is the type of work, trade or profession performed by the person during the reference period.

5. Industry

The term industry is used to refer the activity of the establishment in which the employed person worked during the reference period.

6. Nature of Employment

Nature of employment or employment status comprises the following codes:

1. Regular paid employee
2. Casual paid employee
3. Family worker (Non-agriculture)
4. Family worker (Agriculture)
5. Own account worker (Non-agriculture)
6. Own account worker (Agriculture)

Labour Force Survey Report, 2011

7. Employer
8. Piece/Contract paid worker

6.1. Regular Paid employee: A person who performed some kind of work, during the reference period, for wage or salary, in cash or in kind.

6.2. Casual paid employee: Those employees who work as and when they find the job for which they get paid either in cash or in kind. Example: Gomchen who have performed rituals during the reference period, Lhadrip, etc.

6.3. Family worker (Non-agriculture): A person who helps in an economic enterprise operated by a member of his/her family without payment of wages or salary in the non-agriculture sector. (e.g. a daughter who helps in hand-loom weaving etc.)

6.4. Family worker (Agriculture): A person who helps in an economic enterprise operated by a member of his/her family without payment of wages or salary in the agriculture sector. (e.g. wife who helps her husband in the apple farm or in cultivation or rice)

6.5. Own account worker (non-agriculture): A person who operates his own enterprise all alone in the non-agriculture sector and neither employs anybody to operate his/her enterprise nor employed by anybody. (e.g. petty-trader, advocate who practices independently etc.)

6.6. Own account worker (Agriculture): A person who operates his own enterprise all alone in the agriculture sector and neither employs anybody to operate his/her enterprise nor employed by anybody. (e.g. a farmer growing apple in his own land etc.)

6.7. Self-Employed: A person who works for his own enterprise but sometimes hire others

6.8. Employer: A person who employs at least one person in his/her enterprise directly or through another person whom he pays in cash or in kind.

6.9. Piece/Contract paid worker: A worker who has a temporary contract to do a particular piece of work, but is not an employee of the company who they are working for.

7. Employed

If a person has performed some paid work in cash or in kind, during the reference period for at least one hour or the person has a job or business formally attached but temporarily absent from the work and going to resume the work.

8. Unemployed

Unemployment is based on three categories which are to be followed simultaneously. They are; 'without work', 'available for work', and 'seeking work'.

9. Earnings

It refers to the major or the main source of income through which the person earns a livelihood viz. wage, salary, bonuses, incentives and tips, etc.

Labour Force Survey Report, 2011

10. Household

Household is defined as a group of people who live together under one roof and eat their meals together from the same kitchen irrespective of relationship. A single person who makes his or her own food arrangements is counted as a separate household (one member household).

Who to include in the household member;

1. Those that usually reside in the household and are present on the day of interview.
2. Those who usually reside in the household but are temporarily absent/away from the household from the day of interview for less than six months (Excluding serial no. 3, since they had been away until the date of interview).
3. Those persons registered in the households but lives elsewhere, on labour work, studying including students & monks and also all military personnel who reside in the barracks.

11. Disable

A person is considered disable if they are impaired with the following;

1. Physically unfit for work
2. Mentally unsound
3. Blind
4. Deaf

12. Migration

The movement of people across a specific boundary for the purpose of establishing a new or semi permanent residence.

There are two types of migration:

1. International migration (movement between countries; immigration)
2. Internal migration (movement within the country; emigration)

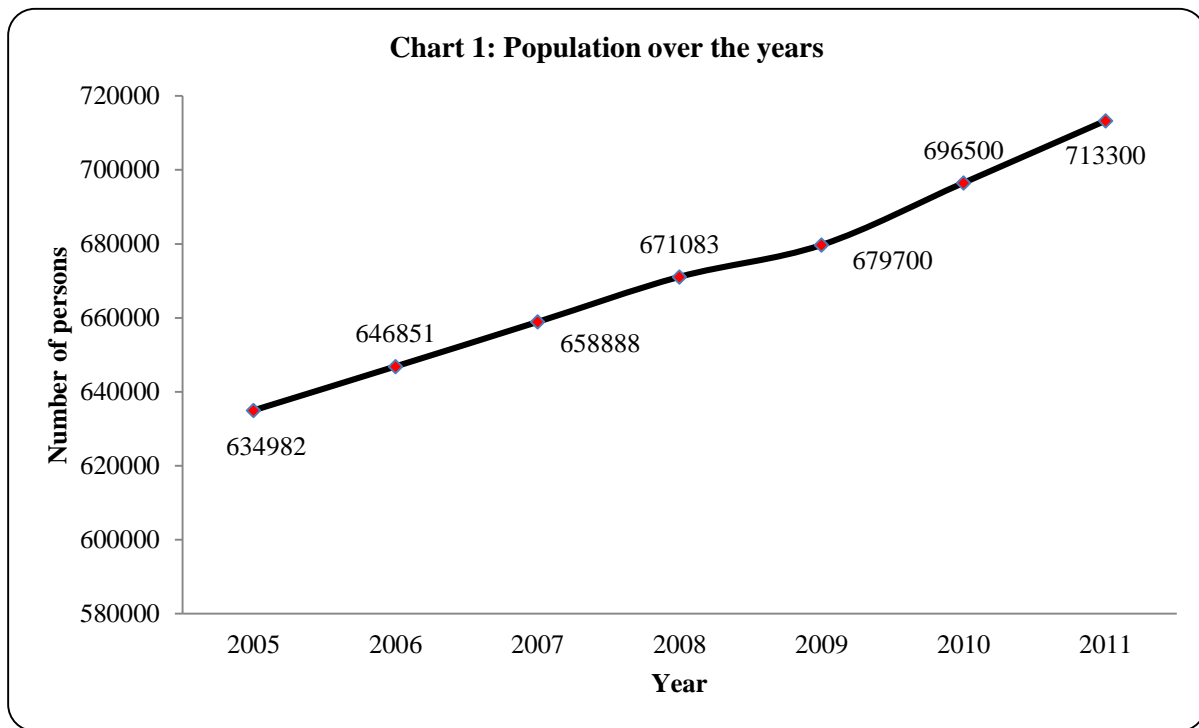

Labour Force Survey Report, 2011

SECTION 3 – SUMMARY FINDINGS

The results of this survey are based on the data collected from 11,870 sample households enumerated during the period from 2nd March, 2010 to 19th May, 2011. In order to facilitate computation and comparison, the results of labour force survey are presented in tables and charts. By using the survey weights for urban and rural separately, the survey population is estimated as **713,300** for the year 2011.

1. Population:

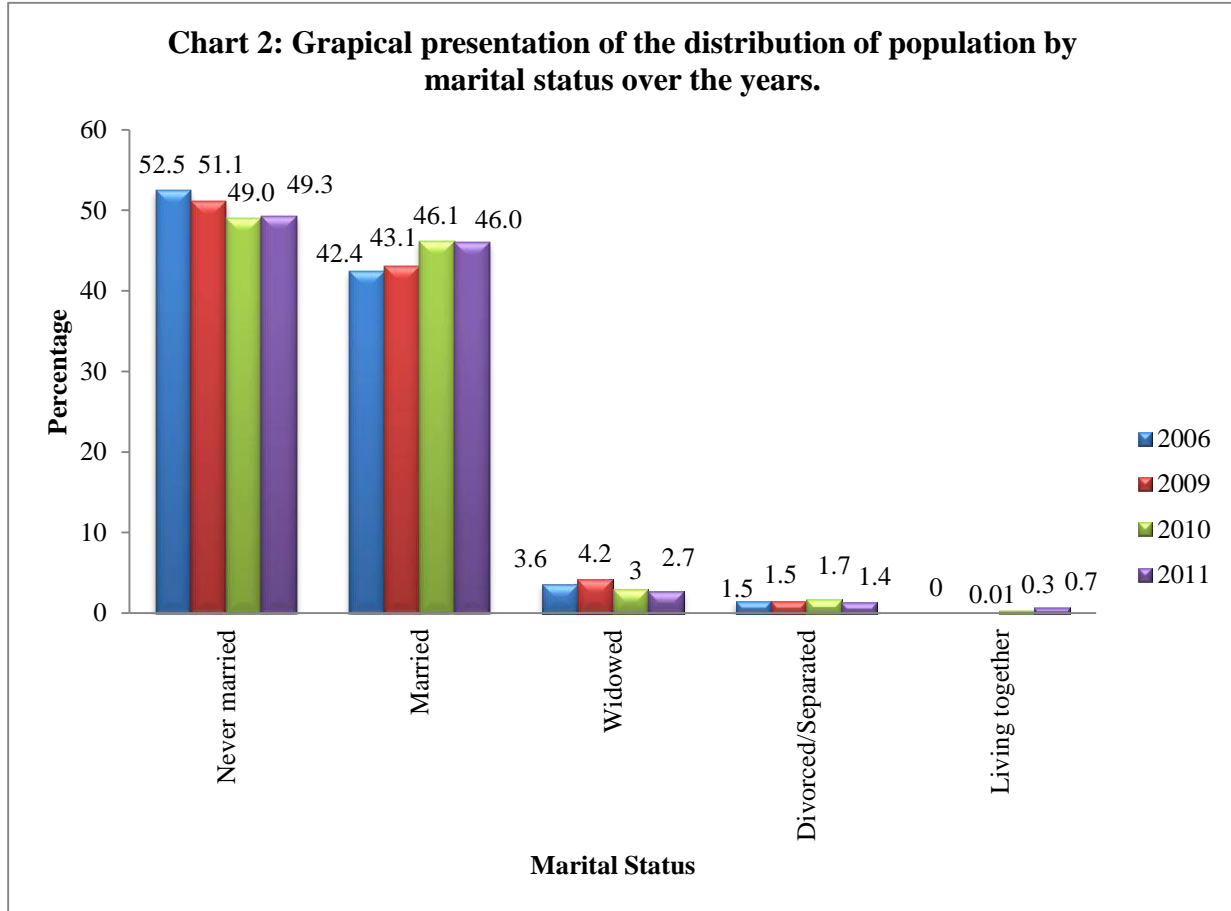

The labour force survey 2011 estimated the nation's population as 713,300 with 348,100 males and 365,100 females. Out of the total estimated population, 68.4% of the population resides in the rural areas compared to 69.2% residing in the rural areas in 2010 and 31.5% of the population are settled in urban areas whereas 30.8% were settled in the urban areas in 2010.

Labour Force Survey Report, 2011

2. Marital Status:

The data on marital status has been collected according to classification of never married, married, widowed, divorced/separated and living together. The proportion of persons in each of the stated categories reported in the current survey compared with those reported in 2006-2011 surveys is given in table 1. Detailed information of 2011 is given at statistical appendix tables 19.0 to 19.5

Labour Force Survey Report, 2011

3. Migration

Table 1: Percentage distribution of population who migration to the current location, 2011 – Bhutan

Labour Force Survey Report, 2011

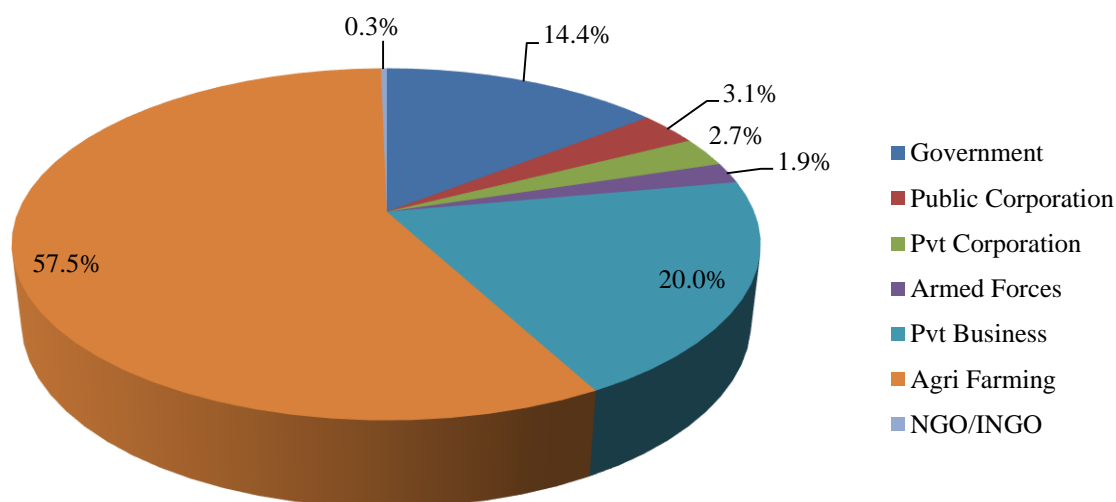

4. Employment Status:

Every job has been classified in terms of major economic sectors. Of the total employed persons, 57.5% were employed in agricultural farming followed 20.0% employed in private businesses and 14.4% employed in the government sectors. Employment in the non-farming activities has increased in general. A comparative picture of the proportions of persons employed in various major economic sectors is given in the table below.

Table 2: Percentage distribution of employed persons by age and type of enterprise, 2011 – Bhutan

Age	Government		Public Corporation		Pvt. Corporation		Armed Forces		Pvt. Business		Agri. Farming		NGO/INGO		Total		Grand Total
	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female

Chart 3: Percentage distribution of employed persons by type of enterprise, 2011-Bhutan

Labour Force Survey Report, 2011

Table 3: Percentage distribution of employed persons by sex and economic activity, 2011 – Bhutan

Economic Activity	Male	Female	Both Sexes
Agricultural & forestry	53.32	67.69	60.15
Mining & quarrying	0.47	0.26	0.37
Manufacturing	3.76	6.84	5.22
Electricity, gas & water supply	3.41	0.91	2.22
Construction	2.18	0.52	1.39
Wholesale & retail trade, repair of motor cycle, personal	6.35	11.07	8.59
Hotels & restaurants	1.70	2.08	1.88
Transport, storage & communication	4.64	0.65	2.75
Financial intermediation	0.82	0.59	0.71
Real estate, renting & business activity	3.82	1.24	2.59
Public administration & defense	12.52	3.78	8.40
Education	3.70	2.21	3.00
Health & social workers	1.06	0.72	0.86
Other community, social & personal service activities	1.70	0.59	1.20
Private household & employed persons	0.53	0.72	0.65

Table 4: Percentage distribution of employed persons by sex and major occupation, 2011 - Bhutan

Major Occupation	Male	Female	Both sexes
Legislators, Senior Officials & Managers	1.9	0.8	1.4
Professionals	8.3	5.3	6.9
Technicians & associate professionals	7.4	2.6	5.1
Clerks	2.1	2.3	2.2
Service workers & shop & market sales workers	8.1	11.8	9.8
Skilled agriculture workers	51.8	67.2	59.1
Craft & related workers	5.3	6.8	6.1
Plant & machine operators & assemblers	6.2	0.6	3.6
Elementary Occupation	4.8	2.5	3.7
Armed forces	4.1	0.1	2.2

The currently employed persons are grouped into eight major categories of employment status i.e. regular paid employees, casual paid employees, family worker (non-agriculture), family worker (agriculture), own account worker (non-agriculture), own account worker (agriculture), employers and piece/contract paid worker.

Table 5 indicates that out of the total employed persons; 41.8% are own-account workers. As expected more female workers (48.7%) are engaged as own-account worker compared to male workers (35.5%)

Table 5: Percentage distribution of employed persons by sex & employment status, 2011 – Bhutan

Employment nature	Male	Female	Total
Regular paid employee	33.7	13.3	24.0
Casual paid employee	5.2	3.1	4.2
Family worker (Non-agriculture)	2.5	4.3	3.4
Family worker (Agriculture)	21.9	30.1	25.8
Own-account worker (Non-agriculture)	8.9	15.2	11.9
Own-account worker (Agriculture)	26.6	33.5	29.9
Employer	0.2	0.2	0.2
Piece/Contract paid worker	0.9	0.4	0.6

Labour Force Survey Report, 2011

5. Hours of Work

Of the currently employed persons, 28.0% worked for 50-59 hours a week. It is also observed that 23.7 % of the employed persons worked for 40-49 hours in a week and 13.7% of the employed persons worked for 70-79 hours a week and 7.0% of the employed persons worked for 80 hours in a week. However, 9.2% of the employed persons did not work for more than 30 hours in a week.

The table below depicts the statistics and proportions of employed persons by hours worked.

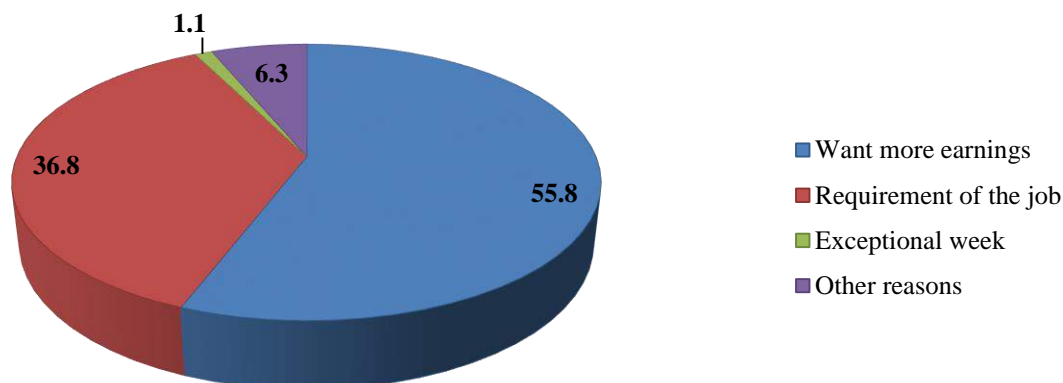

Table 6: Percentage distribution of employed persons by hours worked during the past one week prior to the survey period by sex, 2011 – Bhutan

Sex	Hours Worked							Total
	<30 hrs	30-39 hrs	40-49 hrs	50-59 hrs	60-69 hrs	70-79 hrs	80+hrs	
Male	7.1	6.0	26.3	28.5	11.1	13.7	7.3	100.0

50-54	10.7	0.0	3.4	3.8	2.3	1.7	0.0	3.2	9.5	3.3	13.9	8.0
55-59	8.0	0.0	4.0	1.9	0.8	1.1	0.0	2.1	4.8	3.3	8.3	5.9
60-64	5.7	0.0	2.1	0.6	0.4	0.6	0.0	1.1	0.0	1.1	8.3	4.2
65+	7.5	0.0	0.6	0.6	0.4	0.0	0.0	0.0	0.0	0.0	8.3	5.0

8. Labour Force Participation Rates:

The labour force participation rate has decrease from 68.6% in 2010 to 67.4% in 2011. The labour force participation rate for male (the labour force as a percentage of the male working-age population) has also decreased from 73.6% in 2010 to 72.3% in 2011. However, the female participation rate has shown an increase from 63.9% in 2010 to 67.4% in 2011.

The labour force participation rates are high across the rural areas (70.1%) compared to urban areas (61.2%). In the rural livelihood systems of the region, there is a strong economic need for everyone to work as for urban areas, higher incomes allow for the support of dependents, and greater educational opportunities encourage people to study longer. The pictorial presentation below illustrates the trend of labour force participation rates over the years.

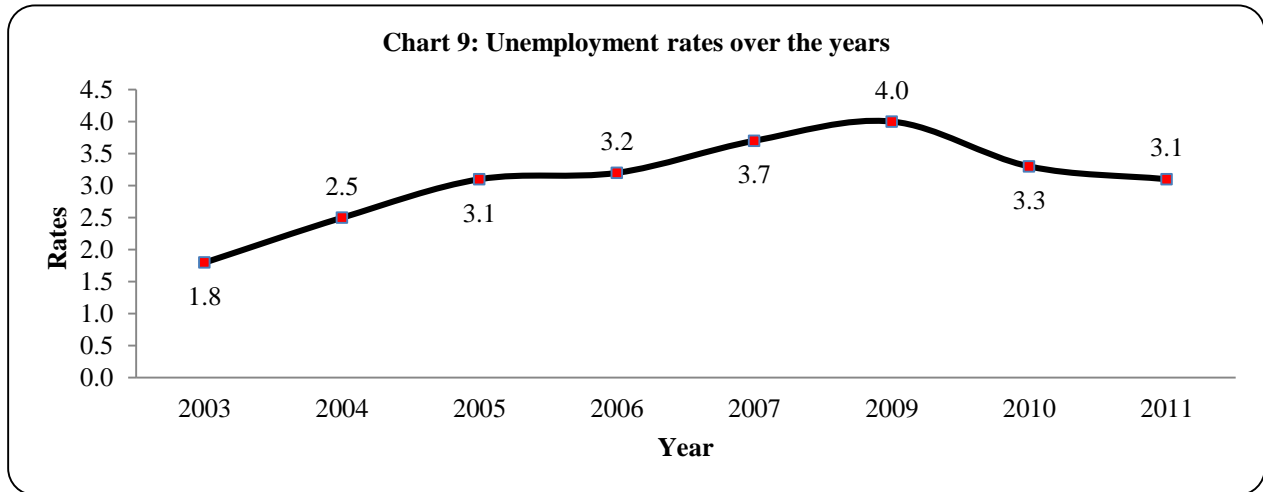

9. Unemployment Status:

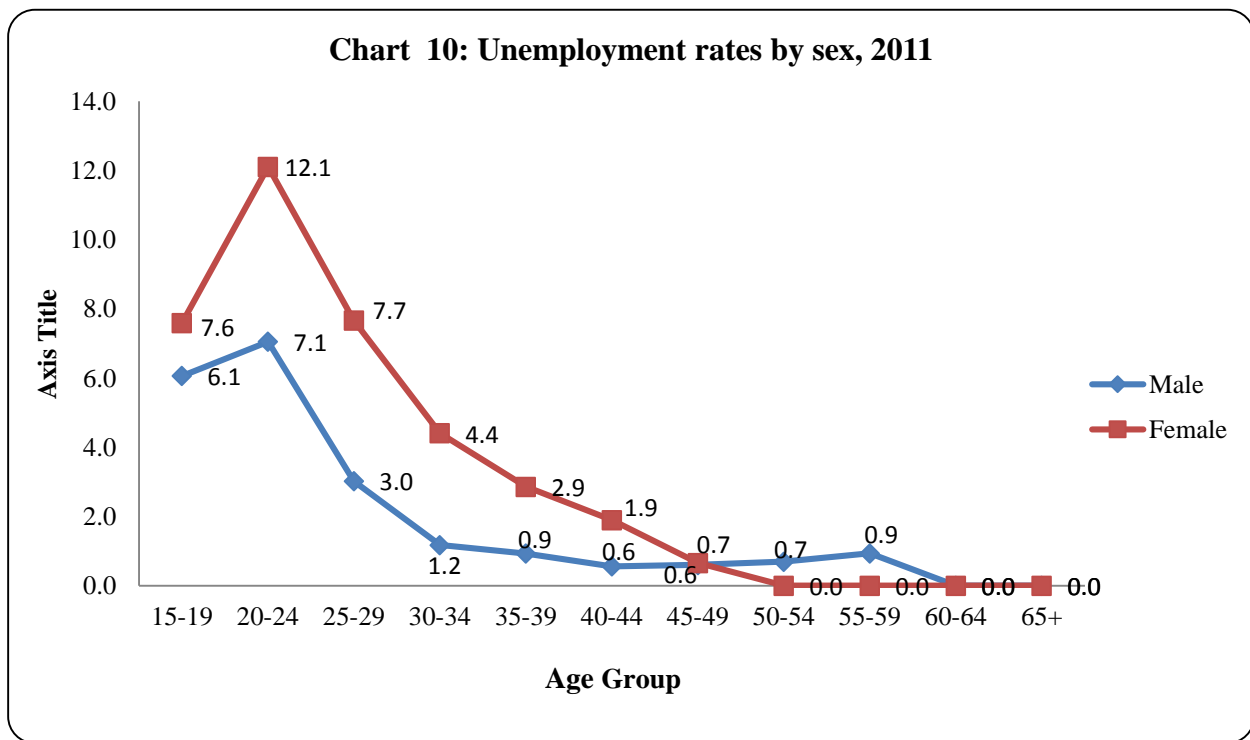

Labour Force Survey Report, 2011

Unemployed rate is defined as the percentage of total unemployed to the total labour force. The unemployment rate has shown a decline from 3.3 % in 2010 to 3.1% in 2011. Female unemployed rate is higher (4.5%) compared to males (1.8%). The LFS 2011 statistics also reveal that more number of people are unemployed in the urban areas (5.8%) than rural areas (2.1 %). Higher rates of unemployment are observed in the ages between 15-19 and 20-24 year. The same pattern is observed for males and females separately. The youth unemployment rate has remained the same as 9.2% in 2011 also. The pattern of high unemployment in the early age groups indicates that these are the youths entering the labour market with certain level of education that are available for work or looking for work but lacks the required skills needed for immediate employment.

The graph below depicts the unemployment trends over the years.

Note: The rate for 2008 has not been included since there was no survey done during that year

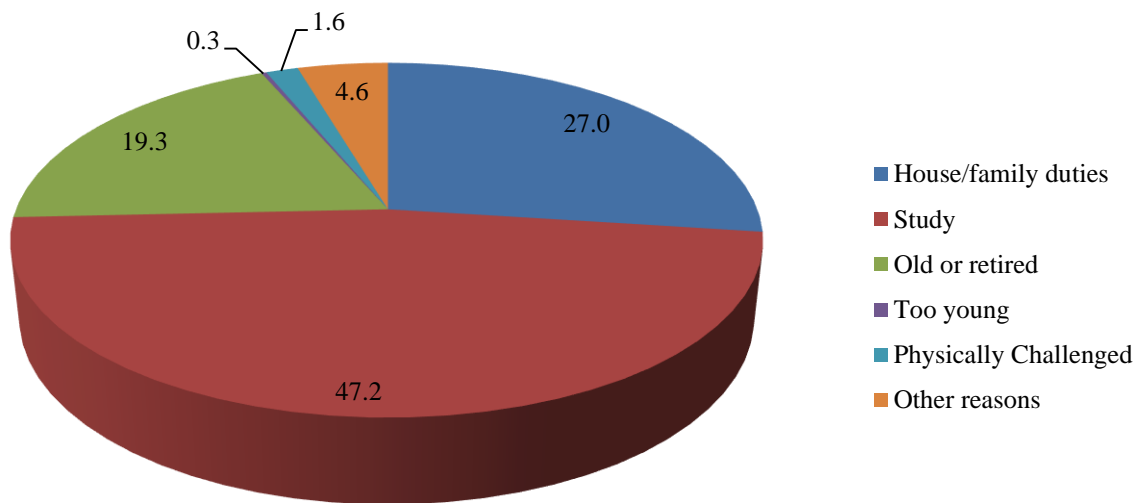

10. Economically Inactive Population

Labour Force Survey Report, 2011

Table 12: Percentage distribution of economically inactive population, 2011 – Bhutan

Age Group	Economically Inactive population						Total
	House/family duties	Study	Old or retired	Too young	Physically challenged	Other reasons
